

## Packable Hemostatic (HEMO) Trauma Trainer - Non-Injured Leg (HEMO-NIL)

The TraumaFX® HEMO-NIL is a ruggedized, tetherless, remote-controlled human patient medical trainer that provides the most authentic simulation of traumatic lower blast injury. State of the art sensor technology provides real-time feedback that takes the guesswork out of trauma simulation. The HEMO-NIL features a full left leg with a bleeding wound at the inguinal crease for hemostatic wound training and a traumatic amputation of the right leg requiring a tourniquet.

### Key Benefits of TraumaFX® HEMO-NIL

- Full left leg with a Hemostatic Wound at the Inguinal Crease that requires packing with gauze and the application of measurable pressure
- Advanced Sensor Technology provides trainers/learners with Instantaneous Feedback of applied pressure, time to occlude bleeding, and volume of blood loss for After Action Reporting (AAR)
- Arterial Bleeding from the Amputation requiring correct tourniquet placement
- Responds to Direct Femoral Artery Pressure for immediate bleeding control
- Extremely realistic, full-motion, remote-controlled animatronics using practical and durable special effects technology
- Specially formulated synthetic tissue with Unparalleled Realism and Durability providing Visual and Tactile Stimuli
- Instantaneous feedback provided through proprietary Remote Control (RC) transmitter with Extended Operating Range
- Can be used with Human Actors
- Crepitus to cue for Crushed Pelvis Injury
- Scrotal Avulsion
- Water Resistant
- Easy to clean and maintain after use
- Optional Burn Leg and Interchangeable Priapism

*The HEMO-NIL can be paired with any TraumaFX® upper trainer to increase training capabilities*
