

TraumaFX® Task Trainers

TraumaFX® is a ruggedized line of high-fidelity simulation devices employing state-of-the-art special effects materials and technologies to deliver incredibly realistic visual and tactile stimuli with lifelike response to treatment. Our newest products cater to the crawl or classroom phase of training. These new products include the TraumaFX® Chest Trainer and the TraumaFX® Packable Wound Trainer (PWT). All TraumaFX® products are created with specially formulated synthetic tissue with unparalleled realism and durability.

Key Benefits of TraumaFX® Chest Trainer:

The TraumaFX® Chest Trainer is a ruggedized partial upper torso medical simulator that helps trainees during the crawl phase of training to treat patients requiring Needle Decompression and Intraosseous (I/O) Infusion. The torso includes a simulated partial rib cage and sternum. Students learn to locate realistic anatomic landmarks to execute critical patient treatment without relying on marked indicators. The unit functions as a stand-alone skills station with multiple training sites that allow for multiple uses with cost-effective replacement components.

- Ruggedized, easy to maintain partial upper torso
- Bilateral needle decompression training sites (full-size 3¼" 14 gauge needle)
- Intraosseous trainer with replaceable manubrium
- Self-healing training sites with replaceable skin plugs
- Rests easily and securely on a flat surface

Key Benefits of TraumaFX® Packable Wound Trainer (PWT):

The Packable Wound Trainer (PWT) is a ruggedized task trainer with a simulated hemostatic wound. The PWT is composed of lifelike synthetic skin and includes a hemostatic wound providing trainees with the ability to execute critical patient treatment such as wound packing and compression training. The PWT functions as a stand-alone skills station during the crawl phase of training.

- Advanced sensor technology provides visual feedback when the correct pressure is applied for the correct amount of time in the correct location
- Can be moulaged prior to usage to increase realism
- Rugged; can be used repeatedly with little or no maintenance
- Easy clean-up with water after use
- Compact design for classroom use and easy storage

All TraumaFX® products are hand crafted in the US.

All TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Awards

- Winner 2011 AMSO Award
- Winner 2011 NTSA Governor's Award - I/ITSEC
- Winner 2010 Innovative Research Award
- Winner 2009 Modeling & Simulation Training Team Award
