LOWER_UNIT	MATT	TraumaFX® Patient Simulator - Multiple Amputation Trauma Trainer(MATT)® - Lower Body	KGS-TFX-LO-1	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	1 Unit	\$76,500.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-MATT-Lower Body-Quantity 5-9	KGS-TFX-LO-5	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$66,500.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-MATT-Lower Body-Quantity 10 - 19	KGS-TFX-LO-10	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	Minimum Purchase of 10 Units	\$57,500.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-MATT-Lower Body-Quantity 20 - 24	KGS-TFX-LO-20	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$56,000.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-MATT-Lower Body-Quantity 25+	KGS-TFX-LO-25	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	Minimum Purchase of 25 Units	\$54,000.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-African American version of the Multiple Amputation Trauma Trainer (MATT)®-Lower Body	KGS-TFX-AA-MATT-1	African American (AA) - TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The AA MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA MATT can be paired with any AA TraumaFX Upper Body.	1 Unit	\$67,995.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator-African American version of the Multiple Amputation Trauma Trainer (MATT)®-Lower Body	KGS-TFX-AA-MATT-5	African American (AA) - TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The AA MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA MATT can be paired with any AA TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$60,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
LOWER_UNIT	NOAB-MATT	TraumaFX® Patient Simulator - Multiple Amputation Trauma Trainer(MATT)® - Lower Body with no Animatronics/Bleeding	KGS-TFX-NOAB-MATT-1	TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The MATT Lower Body is a simulation of a traumatic bilateral amputation without animatronic movement and bleeding. The system is composed of a seamless silicone skin molded over a strong urethane core and anodized aluminum that houses all components. The MATT can be paired with any TraumaFX Upper Body.	1 Unit	\$29,995.00
LOWER_UNIT	NOAN-MATT	TraumaFX® Patient Simulator - Multiple Amputation Trauma Trainer(MATT)® - Lower Body with no Animatronics	KGS-TFX-NOAN-MATT-20	The No Animatronic Packable Hemostatic (HEMO) Trauma Trainer lower body with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation. This simulator also displays a groin injury involving a severed femoral artery, and has a lower leg crush injury. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$49,995.00
LOWER_UNIT	MATT	TraumaFX® Patient Simulator - Multiple Amputation Trauma Trainer(MATT)® - Lower Body - Refurbished	KGS-TFX-LORFRB-1	Refurbished - TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Lower Body with Standard Starter Accessories Kit. Storage case included. The refurbished MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The simulator is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The MATT can be paired with any TraumaFX Upper Body.	1 Unit	\$62,495.00
LOWER_UNIT	ACE	TraumaFX® Patient Simulator - MATT Abdominal Casualty Expectant (MATT-ACE) - Lower Body	KGS-TFX-ACE-1	TraumaFX® MATT Abdominal Casualty Expectant (MATT-ACE) lower body with Standard Starter Accessories Kit and storage case mimics that of an expectant patient with double amputations and severe evisceration of the intestines at the groin area. This simulator is used during triage scenarios so that first responders can better determine which patients have survivable wounds and need to be stabilized versus those that regardless of intervention are considered expectant. The MATT-ACE can be paired with any TraumaFX® Upper body.	1 Unit	\$25,595.00
LOWER_UNIT	CRL	TraumaFX® Patient Simulator - Clinical Response Lower (CRL)	KGS-TFX-CRL-1	The TraumaFX® Clinical Response Lower (CRL) is a ruggedized, tetherless, remote-controlled human patient medical trainer that delivers high-fidelity realism and durability which creates the most authentic simulation of traumatic injuries to support the Continuum of Care from Point of Injury (POI) to Secondary Care. The CRL adds to the robust capabilities of the Multiple Amputation Trauma Trainer (MATT)® and Packable Hemostatic (HEMO) Trauma Trainer by featuring a full left leg with a wound at the inguinal crease for hemostatic wound training, accompanied by venous bleeding at the lower leg. The advanced sensor technology provides student/teacher feedback regarding the application of sufficient pressure, elapsed time to occlude bleeding, and volume of blood loss.	1 Unit	\$94,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - Packable Hemostatic Trauma Trainer (HEMO) - Lower Body	KGS-TFX-HEMO-1	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$73,595.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer - Lower Body - Quantity 5 - 9	KGS-TFX-HEMO-5	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$71,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer - Lower Body - Quantity 10 - 19	KGS-TFX-HEMO-10	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 10 Units	\$70,395.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer - Lower Body - Quantity 20 - 24	KGS-TFX-HEMO-20	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$68,795.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer - Lower Body - Quantity 25+	KGS-TFX-HEMO-25	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 25 Units	\$67,195.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - Packable Hemostatic Trauma Trainer (HEMO) with Gunshot Wound - Lower Body	KGS-TFX-HEMOG-1	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$73,595.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer with Gunshot Wound - Lower Body - Quantity 5 - 9	KGS-TFX-HEMOG-5	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$71,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer with Gunshot Wound - Lower Body - Quantity 10 - 19	KGS-TFX-HEMOG-10	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 10 Units	\$70,395.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer with Gunshot Wound - Lower Body - Quantity 20 - 24	KGS-TFX-HEMOG-20	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$68,795.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer with Gunshot Wound - Lower Body - Quantity 25+	KGS-TFX-HEMOG-25	Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 25 Units	\$67,195.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO-NIL - Packable Hemostatic Trauma Trainer (HEMO) with Non Injured Leg - Lower Body	KGS-TFX-HEMONIL-1	Packable Hemostatic (HEMO) Trauma Trainer lower body with non injured left leg and right leg single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$73,595.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO-NIL - Packable Hemostatic Trauma Trainer (HEMO) with Non Injured Leg - Lower Body - Quantity 5 - 9	KGS-TFX-HEMONIL-5	Packable Hemostatic (HEMO) Trauma Trainer lower body with non injured left leg and right leg single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$71,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO-NIL - Packable Hemostatic Trauma Trainer (HEMO) with Non Injured Leg - Lower Body - Quantity 10 - 19	KGS-TFX-HEMONIL-10	Packable Hemostatic (HEMO) Trauma Trainer lower body with non injured left leg and right leg single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 10 Units	\$70,395.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO-NIL - Packable Hemostatic Trauma Trainer (HEMO) with Non Injured Leg - Lower Body - Quantity 20 - 24	KGS-TFX-HEMONIL-20	Packable Hemostatic (HEMO) Trauma Trainer lower body with non injured left leg and right leg single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$68,795.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO-NIL - Packable Hemostatic Trauma Trainer (HEMO) with Non Injured Leg - Lower Body - Quantity 25+	KGS-TFX-HEMONIL-25	Packable Hemostatic (HEMO) Trauma Trainer lower body with non injured left leg and right leg single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 25 Units	\$67,195.00
LOWER_UNIT	NICL	TraumaFX® Patient Simulator - Non-Injured Complete Lower (NICL) - Lower Body	KGS-TFX-NICL-1	Non-Injured Complete lower (NICL) body with fully intact lower legs and Standard Starter Accessories Kit. Storage case included. The NICL Lower Body is a fully intact lower body composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The NICL can be paired with any TraumaFX Upper Body.	Minimum Purchase of 25 Units	\$29,995.00
LOWER_UNIT	NOAB-HEMO	No Animatronics and No Bleeding (NOAB) TraumaFX® Patient Simulator - Packable Hemostatic (HEMO) Trauma Trainer - Lower Body	KGS-TFX-NOAB-HEMO-1	The No Animatronics and No Bleeding Packable Hemostatic (HEMO) Trauma Trainer lower body with crushed left leg and single amputation with Standard Starter Accessories Kit. Storage case included. This simulator also displays a groin injury involving a severed femoral artery, and has a lower leg crush injury. The HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$32,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
LOWER_UNIT	NOAN-HEMO	TraumaFX® Patient Simulator - Packable Hemostatic Trauma Trainer (HEMO) - Lower Body with no Animatronics	KGS-TFX-NOAN-HEMO-20	Packable Hemostatic (HEMO) Trauma Trainer lower body with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation. This simulator also displays a groin injury involving a severed femoral artery, and has a lower leg crush injury. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 20 Units	\$71,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator-African American version of the HEMO-Packable Hemostatic Trauma Trainer-Lower Body	KGS-TFX-AA-HEMO-1	African American (AA) - Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The AA HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$75,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator-African American version of the HEMO-Packable Hemostatic Trauma Trainer-Lower Body	KGS-TFX-AA-HEMO-5	African American (AA) - Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The AA HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA HEMO can be paired with any TraumaFX Upper Body.	Minimum Purchase of 5 Units	\$71,995.00
LOWER_UNIT	HEMO	TraumaFX® Patient Simulator - HEMO - Packable Hemostatic Trauma Trainer - Lower Body - Refurbished	KGS-TFX-HEMORFRB-1	Refurbished - Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation with Standard Starter Accessories Kit. Storage case included. The HEMO Lower Body is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is equipped with rugged animatronics to mimic the leg movement of a severely injured person. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The HEMO can be paired with any TraumaFX Upper Body.	1 Unit	\$59,995.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body	KGS-TFX-APL-1	TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	1 Unit	\$25,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body - Quantity 5 - 9	KGS-TFX-APL-5	TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	Minimum Purchase of 5 Units	\$25,595.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body - Quantity 10-19	KGS-TFX-APL-10	TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	Minimum Purchase of 10 Units	\$25,295.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body - Quantity 20 - 24	KGS-TFX-APL-20	TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	Minimum Purchase of 20 Units	\$25,095.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body - Quantity 25+	KGS-TFX-APL-25	TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	Minimum Purchase of 25 Units	\$24,295.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) - Upper Body - Refurbished	KGS-TFX-APLFRB-1	Refurbished - TraumaFX® Patient Simulator AirwayPlus Lifecast (APL) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL can be paired with any TraumaFX Lower Body.	1 Unit	\$18,995.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast with Abdominal Evisceration (APL-AE) - Upper Body	KGS-TFX-APL-AE-1	TraumaFX® AirwayPlus Lifecast with Abdominal Evisceration (APL-AE) with a Standard Accessories Kit. Storage case included. The APL-AE Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators, with the addition of an abdominal evisceration. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion, as well as proper ways to treat and protect an eviscerated bowel. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL-AE can be paired with any TraumaFX Lower Body.	1 Unit	\$28,995.00
UPPER_UNIT	APL	TraumaFX® Patient Simulator - AirwayPlus Lifecast (APL) with Abdominal Evisceration - Upper Body - Refurbished	KGS-TFX-APL-AERFRB-1	Refurbished - TraumaFX® AirwayPlus Lifecast with Abdominal Evisceration (APL-AE) with a Standard Accessories Kit. Storage case included. The APL-AE Upper Body is designed to teach students to find realistic anatomical landmarks to execute critical patient treatment without relying on marked indicators, with the addition of an abdominal evisceration. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, and intraosseous infusion, as well as proper ways to treat and protect an eviscerated bowel. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core. The APL-AE can be paired with any TraumaFX Lower Body.	1 Unit	\$22,395.00

UPPER_UNIT	APL-IP	TraumaFX® Patient Simulator - AirwayPlus Lifecast - Intubation/Packable (APL-IP) - Upper Body	KGS-TFX-APLIP-1	TraumaFX® AirwayPlus Lifecast - Intubation/Packable (APL-IP) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL-IP Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding axillary gun shot wound that that requires wound packing to achieve homeostasis. The APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The APL-IP can be paired with any TraumaFX Lower Body.	1 Unit	\$49,995.00
UPPER_UNIT	APL-IP	TraumaFX® Patient Simulator - African American (AA) AirwayPlus Lifecast - Intubation/Packable (AA-APL-IP) - Upper Body	KGS-TFX-AA-IP-1	TraumaFX® African American (AA) AirwayPlus Lifecast - Intubation/Packable (APL-IP) Upper Body with Standard Starter Accessories Kit. Storage case included. The AA APL-IP Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding axillary gun shot wound that that requires wound packing to achieve homeostasis. The AA APL-IP trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA APL-IP can be paired with any TraumaFX Lower Body.	1 Unit	\$53,995.00
UPPER_UNIT	APL-IP	TraumaFX® Patient Simulator - African American (AA) AirwayPlus Lifecast - Intubation/Packable (AA-APL-IP) - Upper Body	KGS-TFX-AA-IP-5	TraumaFX® African American (AA) AirwayPlus Lifecast - Intubation/Packable (APL-IP) Upper Body with Standard Starter Accessories Kit. Storage case included. The AA APL-IP Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding axillary gun shot wound that that requires wound packing to achieve homeostasis. The AA APL-IP trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA APL-IP can be paired with any TraumaFX Lower Body.	Minimum Purchase of 5 Units	\$49,995.00
UPPER_UNIT	APL-IA	TraumaFX® Patient Simulator - AirwayPlus Lifecast - Intubation/Amputation (APL-IA) - Upper Body	KGS-TFX-APLIA-1	TraumaFX® AirwayPlus Lifecast - Intubation/Amputation (APL-IA) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL-IA Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding arm amputation that requires a tourniquet to stop the bleeding. The APL-IA trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The APL-IA can be paired with any TraumaFX Lower Body.	1 Unit	\$49,995.00
UPPER_UNIT	APL-PB	TraumaFX® Patient Simulator - AirwayPlus Lifecast - Pulses/Breathing (APL-PB) - Upper Body	KGS-TFX-APLPB-1	TraumaFX® AirwayPlus Lifecast - Pulses/Breathing (APL-PB) Upper Body with Standard Starter Accessories Kit. Storage case included. The APL-PB Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and breathing. The APL-PB trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The APL-PB can be paired with any TraumaFX Lower Body.	1 Unit	\$63,995.00

UPPER_UNIT	CRU	TraumaFX® Patient Simulator - Clinical Response Upper (CRU)	KGS-TFX-CRU-1	The TraumaFX® Clinical Response Upper (CRU) medical simulator was created specifically to address the treatment of traumatic upper body injuries and incorporates pulses, breathing, and real-time feedback to create a uniquely realistic training experience for Medics and First Responders. Using the CRU, learners are able to physically locate radial, brachial, and carotid pulses, assess breathing patterns (labored, stable, etc.), and use this information to perform appropriate interventions. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). The CRU is constructed with a durable urethane core and specially formulated, life-like silicone skin, and is designed to operate in inhospitable conditions and tough, outdoor scenarios. The CRU is an extremely effective multipurpose training tool allowing learners to perform critical life-saving tasks that include maintaining an airway, needle decompression, cricothyroidotomy, intraosseous infusion, and chest tube insertion. The CRU can be connected to any TraumaFX® lower trainer to increase training capabilities.	1 Unit	\$71,995.00
UPPER_UNIT	APL-PB	TraumaFX® Patient Simulator - African American (AA) AirwayPlus Lifecast – Pulses/Breathing (APL-PB) - Upper Body	KGS-TFX-AA-PB-1	TraumaFX® AirwayPlus Lifecast - African American (AA) Pulses/Breathing (APL-PB) Upper Body with Standard Starter Accessories Kit. Storage case included. The AA APL-PB Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and breathing. The AA APL-PB trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA APL-PB can be paired with any AA TraumaFX Lower Body.	1 Unit	\$63,995.00
UPPER_UNIT	APL-PB	TraumaFX® Patient Simulator - African American (AA) AirwayPlus Lifecast – Pulses/Breathing (APL-PB) - Upper Body	KGS-TFX-AA-PB-5	TraumaFX® AirwayPlus Lifecast - African American (AA) Pulses/Breathing (APL-PB) Upper Body with Standard Starter Accessories Kit. Storage case included. The AA APL-PB Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and breathing. The AA APL-PB trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components. The AA APL-PB can be paired with any AA TraumaFX Lower Body.	Minimum Purchase of 5 Units	\$63,995.00
SYSTEM	APL-IP / MATT	TraumaFX® Patient Simulator - African American System - AirwayPlus Lifecast - Intubation/Packable (APL-IP) and Packable Hemostatic (HEMO) Trauma Trainer - Full System	KGS-TFX-AA-MIP-1	TraumaFX® AirwayPlus Lifecast - Intubation/Packable (APL-IP) Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding axillary gun shot wound that requires wound packing to achieve homeostasis. The APL-IP trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The African American MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components, and is equipped with rugged animatronics to mimic the leg movement of a severely injured person. Comes with the Standard Starter Accessories Kit, and storage cases are included.	1 Unit	\$110,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
SYSTEM	APL-IP / HEMO	TraumaFX® Patient Simulator - African American System - AirwayPlus Lifecast - Intubation/Packable (APL-IP) and Multiple Amputation Trauma Trainer (MATT)® - Full System	KGS-TFX-AA-HIP-1	TraumaFX® African American AirwayPlus Lifecast - Intubation/Packable (APL-IP) Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and has a bleeding axillary gun shot wound that requires wound packing to achieve homeostasis. The APL-IP trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The African American Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components, and is equipped with rugged animatronics to mimic the leg movement of a severely injured person. Comes with the Standard Starter Accessories Kit, and storage cases are included.	1 Unit	\$119,995.00
SYSTEM	APL-PB / MATT	TraumaFX® Patient Simulator - African American System - AirwayPlus Lifecast - Pulses/Breathing and Multiple Amputation Trauma Trainer (MATT)® - Full System	KGS-TFX-AA-MPB-1	TraumaFX® African American AirwayPlus Lifecast - Pulses/Breathing (APL-PB) Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and breathing. The APL-PB trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The African American MATT Lower Body is a simulation of a traumatic bilateral amputation with pulsing arterial bleeding requiring the placement of tourniquets or direct pressure to arrest bleeding. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components, and is equipped with rugged animatronics to mimic the leg movement of a severely injured person. Comes with the Standard Starter Accessories Kit, and storage cases are included.	1 Unit	\$125,995.00
SYSTEM	APL-PB / HEMO	TraumaFX® Patient Simulator - African American System - AirwayPlus Lifecast - Pulses/Breathing and Packable Hemostatic (HEMO) Trauma Trainer - Full System	KGS-TFX-AA-HPB-1	TraumaFX® African American AirwayPlus Lifecast - Pulses/Breathing (APL-PB) Upper Body is a simulation of a severely injured person with a complete, realistic airway for any method of airway intervention, and breathing. The APL-PB trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, chest tube insertion, cricothyroidotomy, IV placement, and intraosseous infusion. The African American Packable Hemostatic (HEMO) Trauma Trainer lower body with full left leg containing venous bleeding and single amputation is a simulation of a traumatic single amputation with pulsing arterial bleeding requiring the placement of a tourniquet or direct pressure. This simulator also displays a groin injury involving a severed femoral artery that requires wound packing to achieve homeostasis, and has a lower leg crush injury with venous bleeding. The system is composed of a seamless silicone skin molded over a strong urethane and anodized aluminum core that houses all electrical and electromechanical components, and is equipped with rugged animatronics to mimic the leg movement of a severely injured person. Comes with the Standard Starter Accessories Kit, and storage cases are included.	1 Unit	\$130,995.00
COMBO - WBS	APL-PB / HEMO	Whole Body System - Packable Hemostatic (HEMO) Trauma Trainer and AirwayPlus Lifecast - Pulses / Breathing (APL-PB)	KGS-TFX-WBS-HPB-1	Whole Body System (WBS) consisting of the Packable Hemostatic (HEMO) Trauma Trainer and the AirwayPlus Lifecast - Pulses / Breathing (APL-PB)	1 Unit	\$137,590.00
COMBO - WBS	APL-PB / MATT	Whole Body System - Multiple Amputation Trauma Trainer (MATT)® and AirwayPlus Lifecast - Pulses / Breathing (APL-PB)	KGS-TFX-WBS-MPB-1	Whole Body System (WBS) consisting of the Multiple Amputation Trauma Trainer (MATT)® and the AirwayPlus Lifecast - Pulses / Breathing (APL-PB)	1 Unit	\$140,495.00
SYSTEM	EMITT-TM	TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical - SYSTEM	KGS-TFX-EMITT-TM-1	The TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical (TacMed) - (EMITT-TM) is a full-body medical trainer for First Responders and emergency care providers. EMITT-TM is a state of the art skills trainer for novices and experienced alike. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). EMITT functions as a multi-purpose tool allowing learners to perform critical life-saving tasks such as maintaining an airway, needle decompression, hemostasis via tourniquet and wound packing, IV insertion, intraosseous infusion, and TBI diagnosis on a simulator.	1 Unit	\$95,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
UPPER_UNIT	EMITT-TM	TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical - Upper	KGS-TFX-EMITT-TMU-1	The TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical (TacMed) Upper (EMITT-TMU) is an upper body medical trainer for First Responders and emergency care providers. The EMITT-TMU offers advanced features and training capabilities for EMTs, Paramedics and other First Responders such as breathing, intubation, tension pneumothorax, a bubbling chest wound, airway obstruction, IV insertion and more. Constructed with a strong urethane core and realistic, durable synthetic skin, the TacMed Upper is an extremely effective multipurpose training tool allowing learners to perform critical life-saving tasks while training in nearly any environment or weather condition. The EMITT-TMU can be paired with any TraumaFX® Lower body.	1 Unit	\$45,118.00
LOWER_UNIT	EMITT-TM	TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical - Lower	KGS-TFX-EMITT-TML-1	The TraumaFX® Emergency Medical Trauma Trainer - Tactical Medical (TacMed) Lower (EMITT-TML) is a lower medical trainer containing a packable wound, amputation, and intraosseous infusion for First Responders and emergency care providers. EMITT-TML is a state of the art skills trainer for novices and experienced alike. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). TacMed Lower is an extremely effective multipurpose training tool allowing learners to perform critical life-saving tasks while training in nearly any environment or weather condition. The EMITT-TML can be paired with any TraumaFX® Upper body.	1 Unit	\$50,877.00
SYSTEM	EMITT-AS	TraumaFX® Emergency Medical Trauma Trainer - Active Shooter - SYSTEM	KGS-TFX-EMITT-AS-1	The TraumaFX® Emergency Medical Trauma Trainer - Active Shooter - (EMITT-AS) is a full-body medical trainer for First Responders and emergency care providers. EMITT-AS is a state of the art skills trainer for novices and experienced alike. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). EMITT functions as a multi-purpose tool allowing learners to perform critical life-saving tasks such as maintaining an airway, needle decompression, hemostasis via tourniquet and wound packing, IV insertion, intraosseous infusion, and TBI diagnosis on a simulator.	1 Unit	\$71,995.00
UPPER_UNIT	EMITT-AS	TraumaFX® Emergency Medical Trauma Trainer - Active Shooter - Upper	KGS-TFX-EMITT-ASU-1	The TraumaFX® Emergency Medical Trauma Trainer - Active Shooter Upper (EMITT-ASU) is an upper body medical trainer for First Responders and emergency care providers. EMITT-ASU is a state of the art skills trainer for novices and experienced alike. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). EMITT-ASU functions as a multi-purpose tool allowing learners to perform critical life-saving tasks such as maintaining an airway, needle decompression, IV insertion, intraosseous infusion, and TBI diagnosis. The EMITT-ASU can be paired with any TraumaFX® Lower body.	1 Unit	\$25,995.00
LOWER_UNIT	EMITT-AS	TraumaFX® Emergency Medical Trauma Trainer - Active Shooter - Lower	KGS-TFX-EMITT-ASL-1	The TraumaFX® Emergency Medical Trauma Trainer - Active Shooter Lower (EMITT-ASL) is a lower body medical trainer for First Responders and emergency care providers. EMITT is a state of the art skills trainer for novices and experienced alike. As the student administers treatment, trainers receive instant feedback of performance via the easy-to-use Remote Control to assess student performance and provide After Action Reporting (AAR). EMITT functions as a multi-purpose tool allowing learners to perform critical life-saving tasks such as hemostasis via tourniquet and wound packing and intraosseous infusion. The EMITT-ASL can be paired with any TraumaFX® Upper body.	1 Unit	\$46,000.00
K9	K9 HERO	TraumaFX® Canine Medical Trainer - K9 HERO	KGS-TFX-K9-HERO-1	The TraumaFX® Canine Medical Trainer (K9 HERO) is a full-body medical trainer for Military Working Dog (MWD) handlers, K9 Trauma Responders, Veterinarians, and veterinary technicians. Designed in partnership with the Department of Defense (DoD), K9 HERO is a state of the art skills trainer for novices and experienced alike. All training sites have been created with realism in mind to best replicate the look, feel and function of actual medical procedures. The exterior of the simulator has been hand-sculpted to mimic a Belgian Malinois and is covered in a durable, non-staining synthetic fur. K9 HERO functions as a multi-purpose tool allowing learners to perform critical life-saving tasks such as maintaining an airway, needle decompression/thoracocentesis, hemostasis, IV insertion, intraosseous infusion, CPR, tracheostomy, and bandaging on a simulator. K9 HERO incorporates the Canine Tactical Combat Casualty Care (C-TCCC) guidelines.	1 Unit	\$34,995.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
K9	K9 - Jump	TraumaFX® Jump Ready Canine Trainer - Includes five (5) Jump Ready K9 Units.	KGS-TFX-K9JR-5	The TraumaFX® Jump Ready Canine (K9JR) is a full-body air-borne jump trainer for Military Working Dog (MWD) and Special Operations K9 handlers. The K9JR mimics a Belgian Malinois in weight and flexibility, and is covered in a durable, non-staining synthetic fur. K9JR functions as an air-borne jump trainer to provide K9 handler recruits the ability to train with the weight and feel of a K9 during air-borne jump exercises. Includes five (5) Jump Ready K9 Units.	1 Unit	\$149,975.00
TASK_TRAINER	PWT	TraumaFX® Packable Wound Trainer (PWT)	KGS-TFX-T-PWT-1	Packable Wound Trainer (PWT) for compression training. The Packable Wound Trainer is a ruggedized part task trainer with a simulated hemostatic wound, and functions as a stand-alone skills station during the crawl phase of training. The trainer uses advanced sensor technology to provide visual feedback when the correct pressure is applied for the correct amount of time in the correct location, and can be mouldaged prior to usage to increase realism.	1 Unit	\$950.00
TASK_TRAINER	CT	TraumaFX® Chest Trainer	KGS-TFX-T-CT-1	Chest Trainer with I/O and Needle Decompression simulation training sites. The TraumaFX® Chest Trainer is a ruggedized partial upper torso medical simulator that help trainees during the crawl phase of training to treat patients requiring Needle Decompression and Intraosseous (I/O) Infusion. The needle decompression trainer accepts 3 1/4" 14 gauge needles, and the I/O site is compatible with the PYNG FAST1® Intraosseous Infusion System or equivalent device.	1 Unit	\$2,075.00
TASK_TRAINER	THWT	TraumaFX® Tourniquet and Hemostatic Wound Trainer	KGS-TFX-C-THWT-1	The TraumaFX® Classroom Tourniquet and Hemostatic Wound Trainer (THWT) is a ruggedized lower torso trainer that takes realism to the next level by helping trainees learn to treat lower body injuries during the crawl phase of training. Students practice on realistic, anatomical landmarks without relying on marked indicators to perform critical interventions. The Classroom THWT trains responders to perform life-saving tasks such as applying a tourniquet or junctional tourniquet to stop bleeding. The Classroom THWT is constructed of a durable core and specially formulated, life-like silicone skin, and is ideal for a classroom setting.	1 Unit	\$7,995.00
TASK_TRAINER	THWT	TraumaFX® Tourniquet and Hemostatic Wound Trainer	KGS-TFX-C-THWT-200	The TraumaFX® Classroom Tourniquet and Hemostatic Wound Trainer (THWT) is a ruggedized lower torso trainer that takes realism to the next level by helping trainees learn to treat lower body injuries during the crawl phase of training. Students practice on realistic, anatomical landmarks without relying on marked indicators to perform critical interventions. The Classroom THWT trains responders to perform life-saving tasks such as applying a tourniquet or junctional tourniquet to stop bleeding. The Classroom THWT is constructed of a durable core and specially formulated, life-like silicone skin, and is ideal for a classroom setting.	Minimum Purchase of 200 Units	\$3,350.00
TASK_TRAINER	C-APL	TraumaFX® Classroom AirwayPlus Lifecast Airway Trainer	KGS-TFX-C-APL-1	The TraumaFX® Classroom AirwayPlus Lifecast (C-APL) medical trainer is a ruggedized upper torso trainer that takes realism to the next level by helping trainees learn to treat upper body during the crawl phase of training. Students practice on realistic, anatomical landmarks without relying on marked indicators to perform critical airway interventions. The Classroom APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, cricothyroidotomy, intraosseous infusion, and intubation. Visual indicators, such as chest rise-and-fall, give the students real time, realistic feedback. The Classroom APL's simulated training sites allow for extended classroom use prior to needing replacement. All replacement consumables are cost-effective. The Classroom APL is constructed of a durable core and specially formulated, life-like silicone skin, and is ideal for a classroom setting.	1 Unit	\$15,995.00
TASK_TRAINER	C-APL	TraumaFX® Classroom AirwayPlus Lifecast Airway Trainer	KGS-TFX-C-APL-200	The TraumaFX® Classroom AirwayPlus Lifecast (C-APL) medical trainer is a ruggedized upper torso trainer that takes realism to the next level by helping trainees learn to treat upper body during the crawl phase of training. Students practice on realistic, anatomical landmarks without relying on marked indicators to perform critical airway interventions. The Classroom APL trains responders to perform life-saving tasks such as maintaining a patient's airway, needle decompression, cricothyroidotomy, intraosseous infusion, and intubation. Visual indicators, such as chest rise-and-fall, give the students real time, realistic feedback. The Classroom APL's simulated training sites allow for extended classroom use prior to needing replacement. All replacement consumables are cost-effective. The Classroom APL is constructed of a durable core and specially formulated, life-like silicone skin, and is ideal for a classroom setting.	Minimum Purchase of 200 Units	\$11,495.00

ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	18v Makita Battery - 3Ah	KGS-TFX-LO-BT-1	3Ah 18v Lithium Ion Makita Battery. The Makita 18-Volt LXT Lithium-Ion battery, charges in 30 minutes. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$138.00
ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	18v Makita Battery - 4Ah	KGS-TFX-4BT-1	4Ah 18v Lithium Ion Makita Battery. The Makita 18-Volt LXT Lithium-Ion battery, charges in 30 minutes. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$192.00
ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	18v Makita Battery - 5Ah	KGS-TFX-5BT-1	5Ah 18v Lithium Ion Makita Battery. The Makita 18-Volt LXT Lithium-Ion battery, charges in 30 minutes. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$270.00
ACCESSORIES/ CONSUMABLES	Master Controller / ECG	Slimline 18v Makita Battery	KGS-TFX-SBT-1	18v Lithium Ion Makita Battery. The Makita 18-Volt LXT Lithium-Ion battery, charges in 30 minutes. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items. This battery fits both the Master Controller and the ECG Monitor.	1 Unit	\$138.00
ACCESSORIES/ CONSUMABLES	K9 HERO	12v Makita Li-Ion Battery	KGS-TFX-12BT-1	12V Lithium Ion Makita Battery, charges in 30 minutes. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$118.80
ACCESSORIES/ CONSUMABLES	K9 HERO / APL-PB / CRU	Ultrafire Batteries	KGS-TFX-UFB-1	Rechargeable Batteries (fits Two-Way Communication System and HERO Remote Control). All Ultrafire products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$10.20
ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	18v Makita Charger	KGS-TFX-LO-MC-1	Makita Charger For 18v Makita Battery. Makita DC18RA Battery charger uses 120V 50-60 Hz input, and delivers an output of 7.2V - 18V DC. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$90.00
ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	18v Makita Charger - 4 Port	KGS-TFX-4PMC-1	Four (4) port Makita Charger For 18v Makita Battery. Makita DC18RA Battery charger uses 120V 50-60 Hz input, and delivers an output of 7.2V - 18V DC. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$354.00
ACCESSORIES/ CONSUMABLES	K9 HERO	12v Makita Li-Ion Battery Charger	KGS-TFX-12MC-1	Makita battery charger for 12v Lithium Ion Battery. All Makita products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$90.00
ACCESSORIES/ CONSUMABLES	K9 HERO / APL-PB / CRU	Ultrafire Battery Charger	KGS-TFX-UFBC-1	Ultrafire Battery Charger. All Ultrafire products are made in Non Trade Agreement Compliant countries and are therefore only sold as open market or commercial items.	1 Unit	\$24.00
ACCESSORIES/ CONSUMABLES	All Units	3.5 Gallon Utility Bucket	KGS-TFX-LO-3UB-1	3.5 Gallon Accessory Storage Utility Bucket	1 Unit	\$18.00
ACCESSORIES/ CONSUMABLES	All Electronic Human Manikins	International 18v Makita Charger (220V)	KGS-TFX-LO-IMC-1	International Makita charger for 18v Makita Battery (220V) Makita DC18RC Battery charger uses 220-240V 50-60 Hz input, and delivers an output of 7.2V - 18V DC.	1 Unit	\$438.00
ACCESSORIES/ CONSUMABLES	K9 HERO	International 12v Makita Li-Ion Battery Charger	KGS-TFX-12IMC-1	International Makita charger for 12v Makita Battery	1 Unit	\$180.00
ACCESSORIES/ CONSUMABLES	All Units	5 Gallon Utility Bucket	KGS-TFX-LO-UB-1	5 Gallon Accessory Storage Utility Bucket with snap-on lid for storage of system accessories and CONSUMABLES.	1 Unit	\$21.60
ACCESSORIES/ CONSUMABLES	CRL	Clinical Response Lower (CRL) Body - Intramuscular Injection Site Skin Plug (Left and Right) - (5 Pack)	KGS-TFX-CRL-IM-5	Replacement Intramuscular Injection Site Skin Plug (Left and Right) for the Clinical Response Lower Body (5 Sets or 5 Pack)	1 Unit	\$78.00
ACCESSORIES/ CONSUMABLES	CRL	Clinical Response Lower (CRL) Body - Femoral Pulse Point Skin Plug - (5 Pack)	KGS-TFX-CRL-FP-5	Replacement Femoral Pulse Skin Plug (Left) for the Clinical Response Lower Body (5 Pack)	1 Unit	\$205.20
ACCESSORIES/ CONSUMABLES	CRL / EMITT-TM Lower / EMITT-AS Lower	Clinical Response Lower (CRL) Body - Tibial I/O Skin Cap (5 Pack)	KGS-TFX-CRL-TC-5	Replacement Tibial I/O Cap (Left) for the Clinical Response Lower Body (5 Pack)	1 Unit	\$97.20
ACCESSORIES/ CONSUMABLES	EMITT-TM Lower / EMITT-AS Lower	Emergency Medical Trauma Trainer (EMITT) - Inguinal Wound Plug	KGS-TFX-EMITT-IWP-1	Replacement Inguinal Wound Plug for the Emergency Medical Trauma Trainer (EMITT)	1 Unit	\$42.00

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
ACCESSORIES/ CONSUMABLES	APL (soft or hard head) / APL-IP / APL-IA / APL- PB / CRU	Large Consumables Pack (APL, APL-IP, APL-PB or CRU)	KGS-TFX-LCP-1	The Large Consumables Package contains the following items: - Qty 60: 18v Batteries - Qty 180: Blood Powder - Qty 6: Legs with boot (customer specified left or right) - Qty 6: Needle D Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 3 for APL-IP and Qty 3 for APL-PB, etc.) - Qty 60: Single Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 30 for APL-IP and Qty 30 for APL-PB, etc.) - Qty 5: Manubrium Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 2 for APL-IP and Qty 3 for APL-PB or vice versa, etc.) - Qty 15: Needle D Pleural Membranes - Qty 5: Multiple Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 2 for APL-IP and Qty 3 for APL-PB or vice versa, etc.)	1 Unit	\$31,608.00
ACCESSORIES/ CONSUMABLES	EMITT-TM Upper / EMITT-AS Upper	Emergency Medical Trauma Trainer (EMITT) - Intravenous Skin Plug	KGS-TFX-EMITT-IVL-1	Replacement IV skin plug for TraumaFX® Emergency Medical Trauma Trainer (EMITT) (fits EMITT-TM and EMITT-AS)	1 Unit	\$36.00
ACCESSORIES/ CONSUMABLES	EMITT-TM Upper / EMITT-AS Upper	Emergency Medical Trauma Trainer (EMITT) - Intravenous Skin Plug (5 Pack)	KGS-TFX-EMITT-IVL-5	Replacement IV skin plug for TraumaFX® Emergency Medical Trauma Trainer (EMITT) - (5 Pack) (fits EMITT- TM and EMITT-AS)	1 Unit	\$162.00
ACCESSORIES/ CONSUMABLES	All Human Manikins with Ultrafire Battery Chargers	International Adapter for 110v plug	KGS-TFX-IA-1	International Adapter for 110v plug	1 Unit	\$10.80
ACCESSORIES/ CONSUMABLES	APL (soft or hard head) / APL-IP / APL-IA / APL- PB / CRU	Medium Consumables Pack (APL, APL-IP, APL-PB or CRU)	KGS-TFX-MCP-1	This Medium Consumables Package contains the following items: - Qty 30: 18v Batteries - Qty 80: Blood Powder - Qty 2: Legs with boot (customer specified left or right) - Qty 4: Needle D Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 2 for APL-IP and Qty 2 for APL-PB, etc.) - Qty 40: Single Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 20 for APL-IP and Qty 20 for APL-PB, etc.) - Qty 4: Manubrium Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 2 for APL-IP and Qty 2 for APL-PB or vice versa, etc.) - Qty 8: Needle D Pleural Membranes - Qty 4: Multiple Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 2 for APL-IP and Qty 2 for APL-PB, etc.)	1 Unit	\$15,086.40
ACCESSORIES/ CONSUMABLES	APL (soft or hard head) / APL-IP / APL-IA / APL- PB / CRU	Small Consumables Pack (APL, APL-IP, APL-PB or CRU)	KGS-TFX-SCP-1	The Small Consumables Package contains the following items: - Qty 10: 18v Batteries - Qty 25: Blood Powder - Qty 2: Legs with boot (customer specified left or right) - Qty 2: Needle D Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB, etc.) - Qty 16: Single Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 8 for APL-IP and Qty 8 for APL-PB, etc.) - Qty 2: Manubrium Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB or vice versa, etc.) - Qty 3: Needle D Pleural Membranes - Qty 2: Multiple Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB, or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB, etc.)	1 Unit	\$7,030.80

Product Type	Product Family	Product Name	Current Order Number/Part Number	Product Description	Unit	Commercial List Price
ACCESSORIES/ CONSUMABLES	APL (soft or hard head) / APL-IP / APL-IA / APL- PB / CRU	Mini Consumables Pack (APL, APL-IP, APL-PB or CRU)	KGS-TFX-MICP-1	The Mini Consumables Package contains the following items: - Qty 6: 18v Batteries - Qty 10: Blood Powder - Qty 2: Needle D Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB, etc.) - Qty 8: Single Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB or CRU or combination of 2 uppers units (e.g. Qty 4 for APL-IP and Qty 4 for APL-PB, etc.) - Qty 2: Manubrium Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB or vice versa, etc.) - Qty 3: Needle D Pleural Membranes - Qty 2: Multiple Use Cric Skin Plugs (5 Pack) - customer specified APL, APL-IP, APL-IA, APL-PB or CRU or combination of 2 uppers units (e.g. Qty 1 for APL-IP and Qty 1 for APL-PB, etc.)	1 Unit	\$2,998.80
ACCESSORIES/ CONSUMABLES	EMITT-TM Upper	EMITT Tactical Medical Upper (EMITT-TMU) Replenish Kit	KGS-TFX-EMITT-TMURK-1	This Replenish Kit contains the following items: Qty 1: Needle D skin plugs (5 Sets, Left and Right) Qty 1: Pleural Membranes for Needle D (5 pack, each package contains 20: 100 total) Qty 1: IV Skin plug (5 pack, each package contains 5: 25 total) Qty 1: Airway Lubricant Qty 5: Replacement Filters Qty 1: Filter Wrench Qty 1: O-rings (package contains 5)	1 Unit	\$790.60
ACCESSORIES/ CONSUMABLES	EMITT-TM Lower / EMITT-AS Lower	EMITT-Lower Replenish Kit (Fits Tactical Medical and Active Shooter models)	KGS-TFX-EMITT-LRK-1	This Replenish Kit contains the following items: Qty 1: EMITT Inguinal Wound Plug Qty 1: Tibial I/O Cap (5 Pack) Qty 5: Replacement Filters Qty 1: Filter Wrench Qty 1: O-rings (package contains 5)	1 Unit	\$246.20
