

TraumaFX Feminization Accessories

The TraumaFX Feminization accessories allow TraumaFX manikins to be augmented with female genitalia and breasts. The attachments provide visual and tactile desensitization to performing interventions on female anatomy. They also help students learn different anatomical landmarks and techniques for patient assessment.

Breast Attachment

KGS-TFX-BBS-1

- Fits any TraumaFX upper manikin
- Easy installation
- Secure fit allows patient to be carried, dragged or transported
- Provides concealment options to hide injuries - teaching students techniques for patient assessment that differ from male casualties
- Water resistant - can be used in any environment or weather condition

Vagina Attachment

KGS-TFX-VG-1

- Fits any TraumaFX lower manikin with detachable genitalia
- Urethra opening is compatible with Foley catheter (with urine release) when installed on the TraumaFX Clinical Response Lower
- Vaginal opening allows students to attempt Foley catheter placement incorrectly - helping them learn landmarks for proper insertion
- Secure fit allows patient to be carried, dragged or transported
