

NOAB-HEMO No Animatronics No Bleeding Hemostatic (HEMO) Trauma Trainer

The TraumaFX® No Animatronics No Bleeding Packable Hemostatic (HEMO) Trauma Trainer (NOAB-HEMO) is a ruggedized trauma trainer that delivers high-fidelity simulations of lower-body blast injuries commonly caused by Improvised Explosive Devices (IEDs) and other explosive devices.

Key Benefits of the NOAB-HEMO

- Single leg amputation with full left leg displaying a crush injury
- Deep wound at left inguinal crease for wound packing
- Realistic, resilient, and water resistant
- Specially formulated synthetic tissue with unparalleled realism and durability
- providing lifelike visual and tactile stimuli
- Crepitus to cue for crushed pelvis
- Can be used with a human actor
- Optional interchangeable priapism
- Scrotal avulsion
- Easy to clean and maintain
